

Storage, Care and Cleaning Instructions

Storage

Store the device where the temperature is between -20° and 45° C (-4° to 113° F). Do not leave the device in your car, because temperatures in parked cars can exceed this range.

Please use the Case supplied and Handle your iPad with care to maintain its appearance.

If you're concerned about scratching or abrasion, you can apply a screen protector in addition to the case supplied.

If the iPad is dropped or you are concerned about its accuracy, please contact info@ekareinc.com

To clean the iPad;

- Unplug all cables and turn off iPad (press and hold the Sleep/Wake button, and then slide the onscreen slider)
- Use a soft, slightly damp, lint-free cloth
- Avoid getting moisture in openings
- Don't use window cleaners, household cleaners, compressed air, aerosol sprays, solvents, ammonia, abrasives, or cleaners containing hydrogen peroxide to clean iPad
- iPad has an oleophobic coating on the screen; simply wipe iPad's screen with a soft, lint-free cloth to remove oil left by your hands
- The ability of this coating to repel oil will diminish over time with normal usage, and rubbing the screen with an abrasive material will further diminish its effect and might scratch your screen.

If disinfection of the tablet and sensor is required, please use cleaning products that are approved specifically for use on touchscreens (eg. PDI Easy Screen™).

Damage to hardware due to abuse, misuse, neglect, negligence, accident, improper storage, or use contrary to the Documentation or Specifications is not covered under warranty. See Terms & Conditions for details.
